WE CREATE DIGITAL JOURNEYS

WHAT WE DO

At Globant, we dream and build digital journeys that matter to millions of users. These kinds of Digital Journeys exceed the creation of a website, an app or even a unified omnichannel experience. It involves the creation of deeper relationships with users by delivering memorable experiences that are personalized, time sensitive, and context aware when leveraging Big Data and Fast Data.

To create Digital Journeys, we bring together engineering, innovation, and design by implementing an ecosystem composed of 3 pillars:

STAY RELEVANT

Our thought leaders help our customers stay relevant in various industries with researched and published articles, organizing SME gatherings, and participating in webinars and conferences.

DISCOVER

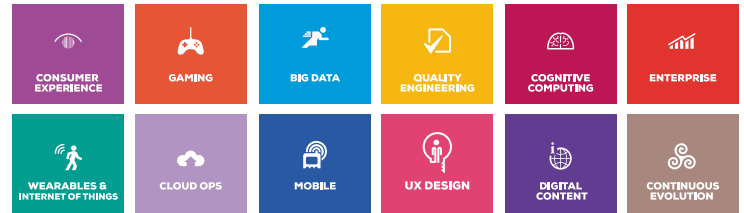

Our team dives into our customers' companies, analyzing the industry and goals in order to understand the business and define the perfect digital journey. We do this by harnessing our Playground, Labs and Innovation as a Service initiatives.

BUILD

Once the digital journey is defined, we develop and build the experience by leveraging 3 key pillars: our studios, agile pods methodology and services platforms.

STUDIOS

The most cutting-edge practices and technologies plus a unique team result in 12 studios where innovation, design and engineering meet scale.

AGILE PODS

Cross-functional and multidisciplinary teams that bring together design and engineering in order to deliver the right products.

SERVICES OVER PLATFORMS

Set of platforms that can be customized using our services to adapt to the specific needs of each company.

CLIENTS
